BLACK WOMEN'S
HEALTH IMPERATIVE

Having Sex? Let's Talk About PrEP!

#LetsTalkAboutPrEP

Did you know?

87% of Black women newly diagnosed with HIV contracted the virus through heterosexual sex.

1 in 48 Black women in the U.S. will receive an HIV diagnosis in her lifetime.

From 2009 to 2014, **84%** percent of transgender people diagnosed with HIV were transgender women.*

PrEP can reduce your risk of HIV infection by **more than 90%**.

Protect yourself from HIV infection!

PrEP yourself with these simple steps:

- Get tested
- Take one pill each day
- Use condoms always
- Take charge of your sexual health to stay HIV negative

PrEP is part of your HIV prevention toolkit that includes getting tested and being aware of your sexual health.

**transgender specific data is limited*
